Lift & Elevator Brake

Advanced Friction Solutions for Extreme Conditions

At IMA Freni, we specialize in developing friction materials that maintain consistent braking force even under the most challenging environmental conditions, such as high humidity, dust, temperature variations, or aggressive mechanical stress.

Our materials are designed for long-lasting performance, minimizing wear and ensuring safety and efficiency over time. These properties make them ideal for demanding sectors like steel production, heavy transport, marine applications, and lifting systems.

We offer a complete service, including: Regeneration of existing components

We restore worn brake blocks, shoes, bands, and other elements by replacing the friction material and reconditioning the entire part. This ensures performance like new, extending component life and reducing costs.

Based on client specifications or our own technical designs, we manufacture new braking elements tailored to your application, delivered fully assembled and ready to install—no additional processing needed.

Whether you're upgrading old equipment or sourcing new parts, IMA Freni guarantees tailored, high-quality solutions that meet the strictest industry requirements.

IMA GREEN REGENERATION, REUSE AND RECYCLING FOR A SUSTAINABLE FUTURE

FOR US, PAYING ATTENTION TO THE ENVIRONMENT AND TO FUTURE GENERATIONS
IS NOT SIMPLY A TREND.

WE HAVE ALWAYS BELIEVED IN A CIRCULAR
ECONOMY THAT FOCUSES ON PEOPLE AND NATURE, WHERE REUSE AND RECYCLING CREATES NOT ONLY
COST EFFICIENCY, BUT IS, ABOVE ALL, THE DIRECTION OF SOCIETY AND THE MARKET.

IN OUR SHOP, THANKS TO THE EXPERTISE ACQUIRED IN OVER 50 YEARS OF ACTIVITY, WE REBUILD BRAKE
PARTS WITH "WORN-OUT" MATERIALS.

IN THIS WAY WE ARE ABLE TO REDUCE WASTE MATERIALS BY BETWEEN 20 AND 30 PERCENT,
THUS REDUCING WASTE AND THE NECESSITY TO FIND DISPOSAL SOLUTIONS.

RE-GENERATION IMA!
